Greek Conference on Blue Growth 24 June 2021

Greek Conference on
Blue Growth

24 June 2021

From marine and maritime Services towards new drivers for economic and territorial change

The Conference focused on the development of a sustainable Blue growth and its potential role as a driver for change in Greece and the Mediterranean in general. **It took into consideration the new policies adopted and promoted by the EU in the 2021-2027 period.**

Various experts exchanged their insights with policymakers, academics, and the business sector with the aim of understanding & building integrated development strategies and making policy suggestions for the marine and adjoining territories.

Main topics:

- **National Strategies incorporating Blue Growth**
- Blue economy and **maritime transport challenges** for Greece and the Mediterranean Basin
- Integrated Maritime Policy & **Insularity**: Creating new paths for 2021-2027
- Regional development and interregional cooperation for the Blue Economy sectors
- **Offshore Wind Energy in Greece**: Institutional framework, challenges and perspectives
- Blue Growth as a catalyst for regional government in the new programming period 2021-2027
- The role of the **ESPON programme in Blue Growth** “The capacity of integrated territorial development to realise the potentials of Blue Growth”
- Maritime **eco-clusters as engines** of economic growth of seaport regions
- New opportunities for **islands** with regard to **climate change**
- Strengthening cross-fertilisation of policy-making across sectors to support sustainable blue growth: lessons from ESPON COMPASS
